SUMMARY

Senior Software Engineer with 7+ years of experience building scalable cloud platforms, APIs, and developer infrastructure. Founding engineer of a multi-cloud JAMStack hosting platform serving enterprise customers globally. Strong expertise in distributed systems, cloud infrastructure, security, and platform engineering.

SKILLS

Languages: Go, Node.js, JavaScript/TypeScript, Lua

Frontend: React, Redux, Next.js, CSS, React Testing Library

API & Architecture: REST, GraphQL, gRPC, Event-Driven Systems (Kafka, AWS SQS), Distributed Systems

Cloud & DevOps: Docker, Kubernetes, Terraform, AWS CloudFormation, GoCD (CI/CD), AWS, Azure, GCP, Cloudflare

Data & Messaging: MongoDB, Redis, Elasticsearch, Kafka, RabbitMQ

Engineering Practices: Trunk-Based Development, TDD, Clean Code, Refactoring, Design Patterns, Automation, Observability

EXPERIENCE

Contentstack — *Senior Software Engineer, 2021–Present*

Contentstack Launch – Multi-Cloud Hosting Platform

- Founding engineer of an enterprise JAMStack hosting and deployment platform powering global websites.
- Led architecture of the delivery plane and build orchestration system enabling scalable multi-stage deployments.
- Implemented multi-cloud deployments across AWS, Azure, Google Cloud and Cloudflare.
- Designed event and log pipelines using Kafka, RabbitMQ, Elastic/OpenSearch and Redis.
- Built high-performance APIs and services in Go and Node.js.
- Developed edge routing and authentication using NGINX/OpenResty and Cloudflare Workers.
- Improved global performance via cache priming and edge optimizations.
- Built and integrated GitHub & Bitbucket Cloud for automated repository deployments.

Raw Engineering — *Application Engineer, 2018–2021*

NBA Admin Platforms (SKU & Package Management)

- Built React/Redux + Node/Express applications enabling product teams to manage mobile app SKUs, pricing, digital packages, uploads, logs, and subscription configurations for Apple and Android platforms, supported by background job processing and MSSQL-based services.

NBA Open Identity Network (OPIN) Admin Portal

- Built React/Redux admin portal enabling partner integrations, authentication and analytics dashboards.

Schneider.com Enterprise Platform

- Developed a Next.js platform integrating Contentstack CMS and marketing services for a scalable enterprise website.

VMware GovCloud BackOffice Orchestration

- Built React/Redux + Node SSR applications to manage onboarding, billing and subscription workflows.

TIBCO Documentation Platform — Contributed to the React/Redux-based documentation platform.

ACHIEVEMENTS

Contentstack Above and Beyond Award (2024) · Rising Star Award — Raw Engineering (2019)
